### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 17 September 2003.
- 2a) ☒ This action is **FINAL**.                      2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☒ Claim(s) 1-9 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.

**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ando (5,109,279) in view of Yamaguchi (5,790,204). (*This is the same rejection as previously presented*).

**Claim 1:**

Ando discloses:

a receiving means for receiving a television broadcast signal, see Fig. 1 items 12, 14;

a first output means for outputting a first video signal based on a video signal contained in a television broadcast received by said receiving means, see Fig. 1 item 18;

a second output means for outputting a second video signal based on an additional information signal contained in the television broadcast signal received by said receiving means, see Fig. 1 item 16;

a second compression means for compressing the second video signal and outputting a second compression video signal, see col. 2 line 27;

and a compositing means for compositing, and outputting onto monitor, a first video signal and the second compression video signal so as to be displayed on different screen portions of said monitor, see Fig. 1 items 36, 38, 40, Fig. 3;

the difference between the claimed invention and Ando's disclosure is that Ando does not explicitly say: the television broadcast signal is digital, the first video signal is compressed by a first compression means. However, receiving digital television broadcast signal is conventional and at level of one skill in the art, and first compression means as claimed is known in the art as evidence see Yamaguchi at Fig. 5 items 113, 123. Ando would have rendered the claimed invention obvious in view of these well known features. An artisan would be motivated to combine the references to arrive at the claimed invention; this combination would effectively assist the viewer when viewing multiple signals on one display. Therefore, the claimed invention would have been obvious to a person of ordinary skill in the art at the time the invention was made.

### ***Response to Arguments***

3. Applicant's arguments, regarding claim 1 have been fully considered but they are not persuasive.

Applicants argue, on page 12 second paragraph of the REMARKS, "that Ando and/or Yamaguchi, taken alone or in combination, fail to disclose or suggest a digital television receiver having at least the element of "a receive means for receiving a digital television broadcast signal. (Emphasis Added)." These arguments are not persuasive, because it was admitted in the Office Action that Ando does not explicitly say that the

Art Unit: 2614

television broadcast signal is digital; however, receiving digital television broadcast signal is conventional and at level of one skill in the art; and artisan would be motivated to modify Ando and/or Yamaguchi for receiving digital signal in order to provide, inter alia, improved quality picture. And, on page 12 last paragraph of the REMARKS, Applicants request the Examiner provide references that teach receiving digital television broadcast signal is conventional in the art. Accordingly, the reference U.S. Patent (5,598,222) to Inventor Lane is cited (see for instance col. 1 lines 15-21), this reference was already provided to the Applicants; and the Applicants also discussed receiving digital television broadcast signal as conventional in the art (see specification page 1 lines 10-17 where PRIOR ART is discussed).

***Allowable Subject Matter***

4. Claims 2-9 are allowed.

**Conclusion**

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any
